

5. Make Changes

- If you cloned, use your favorite IDE, e.g. jGrasp :(
- Of use the online editor
 - Good for writing documentation
 - Maybe a few lines of code, I won't do that

Markdown Cheatsheet

- # to ##### heading, level 1 to 6
- *italicize*, **bold**
- [text seen by others](actual link when they click on this)
- Image, drag and drop into editor, or ![description](link_to_image)
- List, each item on a separate line, starting with a hyphen - or 1.
- Code, prefix ```language and end with ``` , both on another line.
