

# What else to get

- **education.github.com/pack** -> a lot of free stuff, including free private repositories on GitHub, so you can save your APCS code online for easy access without violating the school honor code
- **desktop.github.com** -> GitHub Desktop, use it to clone (download) your repository (project), work on it locally with your favorite IDE, commit (save) your changes, push (sync) your progress, and your code is always there
- **code.visualstudio.com** -> Visual Studio Code, one of my favorite editors

Next Meeting: Oct 31
